

PLSC 308: “Introduction to Political Research”
Final Exam Study Guide

Everything in the [midterm study guide](#), plus:

- Active (survey) mode
- Assimilation effects (in question order)
- Boxplot
- Branching question
- “CATI” survey
- Central tendency
- Closed-ended question
- Confidence interval
- Continuous variable
- Contrast effects (in question order)
- Correlation
- Cross-Sectional
- Crosstable
- Discrete variable
- Dotplot
- “Double-barreled” question
- Filter question
- Histogram
- Inference
- Inter-quartile range
- Interview schedule
- Interviewer bias
- Level of significance
- Linear relationship
- Longitudinal
- Mean
- Median
- Missing data
- Mode
- Monotonic relationship
- Nonlinear relationship
- Null hypothesis
- Open-ended question
- P-value
- Panel
- Passive (survey) mode
- Range
- Scatterplot
- Social desirability bias
- Standard deviation
- Structured interview
- Survey mode
- Survey nonresponse
- Type I error
- Type II error
- Unstructured interview
- Variance
- Variation
